Savings available when sending franked mail

A franking machine offers many advantages over stamps, not least of which are the savings that can be made (see Royal Mail rate comparison chart above).

Main benefits

Advertising	Looks more professional, and multiple logos allow you to advertise different parts of your business.
Convenient	Selecting the exact postage means no more over-stamping (which will save you money) or under-stamping (which will save embarrassment). It also means no more trips to buy stamps and it is quicker than sticking them on. Integrated electronic scales mean your post is weighed and franked accurately.
Saves Money	Savings of up to 8p per item is available for standard 1st and 2nd class post. Save up to 47p per item (on large letters) and £1.19 per item (on packets).
Grow Your Business	Mail shots work. For mailings in excess of 1,000 items, greater discounts are available and Royal Mail will collect.
Accountable	Accounting software allows for better cost control. It is updated via the internet and is PIN protected for greater security. Undelivered letters are returned by Royal Mail free of charge.
